- Must be on the attached BPA Qualified Products List.
- Must be installed on a unitary system with a constant-speed supply fan.
- Split systems and rooftop units with variable speed fans are not eligible.

Rebate(s) will not exceed 70% of total installed cost. To ensure availability of funds project must be pre-approved.

Upon signing this agreement, customer acknowledges the following:

Rebate offer(s) may be changed or discontinued at any time by Modern Electric Water Company (MODERN). MODERN disclaims any warranty, whether expressed or implied, regarding the energy efficient upgrade(s) listed on this application for any materials or labor associated with installation, maintenance, repair, or any energy savings associated with use.

I understand that the energy efficient upgrade(s) must be installed to MODERN specifications, and certify that I, or my contractor, have reviewed the specifications prior to beginning work. When selecting a contractor, I understand that it is the business owner's responsibility to request proof of insurance and licensing that meets the statutes and rules of the Washington Construction Contractors Board. MODERN strongly recommends validating qualifications before work begins.

I understand the above and certify that I am a customer of MODERN, that the energy efficient upgrade(s) are installed at the address indicated and that this address is within the MODERN service territory.

Mail original completed rebate application, final invoice and final AHRI for project to:

**Modern Electric Water Company
Attn: Energy Efficiency Rebates
5625 NE Elam Young Parkway #100
Hillsboro, OR 97124
FAX: 1-503-344-6942
Rebates@esgroupllc.com**

Rebate Applications are due within six months of purchase to qualify.

Purchase & installation must be between July 1, 2020 and August 31, 2021 to qualify for the rebate promotion.

Allow 8 to 10 weeks for rebate processing, after the receipt of the final invoice and paperwork.

Call 1-888-883-9879 to learn about additional energy efficiency programs.

Participation in this energy efficiency program allows Modern Electric Water Company to use your electrical energy consumption history for energy savings research. Your consumption history may be shared anonymously with Bonneville Power Administration for energy savings verification and research.

NON-RESIDENTIAL ADVANCED ROOFTOP UNIT CONTROL (ARC) PROMOTIONAL REBATE PROGRAM

Steps to Participation

1. GETTING STARTED

- Contact Modern Electric Water Company (MODERN) Efficiency Services (rebates@esgroupllc.com) regarding a potential non-residential ARC lite or full retrofit.
- Forward the Non-Residential rebate application & AHRI certificate to rebates@esgroupllc.com.
- The payment is \$125.00 per ton for lite retrofit or \$250.00 per ton for full retrofit.
- To calculate the rebate, sum the tons from all retrofitted RTU's installed and then round to the nearest whole ton or round each individual retrofitted RTU to the nearest whole ton, then sum all rounded tons.
- This measure is available for retrofits only.
- ARC projects are not eligible for a Connected Thermostat payment.
- RTU heating fuel type may be electric or gas.

2. PRE-INSTALLATION CONDITIONS

- **ARC – Retrofit Lite:** Products add one of the following equipment options to the existing RTU:
 - A VFD and controller for variable speed fan operation; or
 - A multispeed motor and controller for multispeed fan operation.
- **ARC – Retrofit Full:** Products add one of the following equipment options to the existing RTU:
 - A VFD and controller for variable speed fan operation; or
 - A multispeed motor and controller for multispeed fan operation.
 - Digital, integrated economizer control with either differential dry-bulb, or differential enthalpy with fixed dry-bulb high-limit shutoff; and
 - Demand Control Ventilation with proportional control, based on CO2 sensor reading.
- RTU has a cooling capacity equal to or greater than five tons;
- RTU has a unitary system (split systems are not eligible); and
- RTU has a constant-speed supply fan (RTU's with variable speed fans are not eligible).
- RTU must be installed on an existing rooftop unit; and
- RTU must be listed on the ARC Qualified Products List (QPL)
- An AHRI certificate must accompany the pre-approval to calculate the rebate incentive.

3. PROJECT PRE-APPROVAL

- MODERN Efficiency Services sends the pre-approval to the contractor. Project are pre-approved for a six-month timeframe.
- If the RTU installation is not completed within the six-month timeframe the contractor or customer must reapply for the rebate. There is no guarantee that the rebate funds will be available or that the rebate amount will remain the same. Rebate(s) are available on a first come, first serve basis and are subject to availability of funds.
- Purchase & installation must be between July 1, 2020 and August 31, 2021 to qualify at promotional level.

4. DOCUMENTS REQUIRED TO PROCESS YOUR REBATE(S)!

- The contractor final invoice(s) including equipment order or purchase date and the installed cost.
- The equipment model on the invoice must match the AHRI certificate.
- Completed Non-Residential ARC rebate application with the date of installation.

Documents can be mailed to the address on the rebate application, faxed to 1-503-344-6942 or emailed to rebates@esgroupllc.com.

5. RECEIVE YOUR REBATE

You can expect to receive your rebate 8 to 10 weeks after the receipt of all final required documentation. Rebate(s) will not exceed 70% of the total installed cost.

All work must meet Bonneville Power Administration (BPA) and Modern Electric Water Company program installation requirements.

For additional questions, call 1-888-883-9879.

Advanced Rooftop Unit Control Qualified Products List

Applicable to: Commercial Full ARC and ARC-Lite Retrofits
 Effective: October 1, 2019 to September 30, 2021
 Product List last updated: October 1, 2019

The product list is periodically updated to reflect newly qualified models. For more information, or to request that products be added to the list, please visit BPA's Trade Ally Network NW website at tradeallynetworknw.com. All product additions are reviewed and accepted by Bonneville Power Administration prior to publication on the product list.

Full ARC Retrofit:

Manufacturer	Model
Bes-Tech*	Digi-RTU
Enerfit*	Enerfit v1 or v2 controller
Honeywell*	LCBS with SmartVFD and LGW1000 Gateway
Johnson Controls*	Verasys System with Smart Building Hub and Constant Volume Controller
Pelican Wireless Systems*	Pelican solution that includes: <ul style="list-style-type: none"> • Pelican TS200 or TS200H (with a plus50 sensor) or a TS250 or TS250H Thermostat • Pelican zone controller Z8 or Z24, or PEARL Economizer • Pelican Extended Range Wireless Gateway
Transformative Wave*	Cobalt with CATALYST CATALYST with eIQ BMS
Unity Energy Solutions*	Unity solution that includes: <ul style="list-style-type: none"> • USC Site Controller • SMT400 Thermostat or M-172 PLC Controller • Site Support Package Subscription

ARC-Lite Retrofit:

Manufacturer	Model
Bes-Tech*	Digi-RTU
Enerfit*	Enerfit v1 or v2 controller
Honeywell*	LCBS with SmartVFD
Johnson Controls*	Verasys System with Smart Building Hub and Constant Volume Controller
Lennox*	ARC with DCV
NexRev*	DrivePak
Pelican Wireless Systems*	Pelican solution that includes: <ul style="list-style-type: none"> • Pelican TS200 or TS250 Thermostat • PEARL Economizer • Pelican Extended Range Wireless Gateway
Transformative Wave	CATALYST Lite
Unity Energy Solutions*	Unity solution that includes: <ul style="list-style-type: none"> • USC Site Controller • SMT400 Thermostat or M-172 PLC Controller

*Though not a requirement of the measure, additional features such as web-enabled monitoring and controls are beneficial to ARC retrofits. Products that allow for this option are demarcated with an asterisk above.

Advanced Rooftop Unit Control Qualified Products List

Applicable to: Commercial Full ARC and ARC-Lite Retrofits
Effective: October 1, 2019 to September 30, 2021
Product List last updated October 1, 2019

Advanced Rooftop Control (ARC) retrofits add a variable frequency drive (VFD) and controls to existing, constant-speed HVAC rooftop unit (RTU) supply fans. There are two types of ARC products offered, depending on their feature sets.

ARC Retrofit – Lite

ARC-Lite products add one of the following equipment options to the existing RTU:

- A VFD and controller for variable speed fan operation; or
- A multispeed motor and controller for multispeed fan operation.

ARC Retrofit – Full

Full-ARC products add one of the following equipment options to the existing RTU:

- A VFD and controller for variable speed fan operation; or
- A multispeed motor and controller for multispeed fan operation.
- Digital, integrated economizer control with either differential dry-bulb, or differential enthalpy with fixed dry-bulb high-limit shutoff; and
- Demand Control Ventilation with proportional control, based on CO₂ sensor readings.

Products that do not qualify for an ARC incentive may still be considered for incentives under the custom analysis path.
